H2020 EuroCPS - First Open Call for SMEs and New Entrants - Cyber-Physical Systems

Call deadline: Wednesday June 3, 2015 – 17h00 (Brussels time)

The EuroCPS project was funded under ICT1.b 2014 Smart Cyber-Physical Systems [Innovation actions] and has launched its first Open Call for Industrial Experiments (Innovative CPS).

SMEs and new entrants are invited to submit proposals addressing Industrial Experiments aiming to develop CPS products and components focusing on at least one of the following areas:

- Software intensive projects whose expected outcomes are software prototype demonstrators running on a EuroCPS platform.
- System integration projects whose expected outcomes are integrated system component prototypes.
- CPS with innovative components projects whose expected outcomes are system architecture virtual prototype demonstrators of the CPS products.

Details on the Open Call at: <https://www.eurocps.org/innovators-projects/open-calls/>

AVAILABLE FUNDING

The maximum European Commission contribution for industrial experiments per applicant is 150 kEUR. The Funding rate is 70 %. The Maximum duration of industrial experiment is 18 Months. This comes in addition to coaching by competence centres and assistance from platform providers.
